

Free Public Presentation. All welcome.

# An Inconvenient Truth

## Climate Change: the Science and the Solutions

Climate change is one of the greatest challenges facing the world in the 21st century. Human greenhouse gas emissions are rising rapidly, as the global population continues to grow quickly and as developing countries strive for the lifestyles and economies of developed countries. Climate change science indicates that the world must contain global warming to within two degrees of pre-industrial levels, to avoid the most serious potential consequences of runaway global warming. This requires that solutions are adopted to reduce emissions deeply and quickly, which in turn requires that solutions are adopted by individuals, businesses and all levels of government. We must overcome our denial of the global warming problem, but we must also avoid slipping into despair at the scale of the challenge ahead of us.

### Andrew Dickson Climate Change Messenger

Andrew Dickson is a renewable energy developer who became a Climate Change Messenger after training with Al Gore in November 2006. He has been delivering Al Gore's climate change presentation extensively since then, and will shortly assist with the training of 170 new Climate Change Messengers. Andrew will explain some of the science behind climate change and will present practical solutions for individuals, businesses and governments.

**We are all part of the problem, and  
we can all be part of the solution**

Brought to you by

Monday 10 and Tuesday 11 September 2007  
Adelaide Town Hall, King William Street, Adelaide

**Monday 10 September**

6.15pm for a 6.30pm start – 7.30pm

Auditorium, Adelaide Town Hall  
King William Street, Adelaide
